

# **Problems of science and education in the field of natural sciences in Ukrainian universities**

Igor Denysenko

*School of Physics and Technology, V. N. Karazin Kharkiv National University, Svobody sq. 4,  
61022 Kharkiv, Ukraine*

It is planned to discuss the present situation with the education and scientific work in the field of natural sciences in Ukrainian universities. Main problems connected with preparation of high-quality specialists and with scientific studies are pointed out. As examples, the education and research work at a Department of Physics and Technology and a Department of Computer Sciences are considered. Effects of education in the field of natural sciences on Ukrainian society are also discussed.
